ABOUT ME

AI Engineer with two years of experience at the Egyptian Air Force, specializing in building practical and high-impact AI solutions in NLP and Computer Vision. Experienced in Machine Learning, Deep Learning, and hybrid architectures, with strong proficiency in Python, C++, and full-stack web development. Contributed to mission-critical military AI systems, demonstrating reliability and performance under high-pressure, high-stakes conditions. Skilled in Cisco networking and systems integration. Academically, developed a Multimodal Sentiment Analysis system as a graduation project, combining text, emoji and audio into a unified deep learning model.

EDUCATION

Military Technical College| 2018-2023

- **Bachelor's degree of electrical engineering (computer engineering and Artificial Intelligence department) with very good with honor.**

WORK EXPERIENCE

Network Administrator and Backend Developer

Egyptian Air Force. ILS | 12/2023-7/2024

- Network administration and support all over the Air Force Units.
- Leveraged knowledge of Cisco Networking to support systems integration across secure military networks.
- Developed Web Applications using Flask integrated with MySQL databases to serve and monitor the Military networks.

AI and Python Developer & Instructor

Egyptian Air Force. ILS | 8/2024-8/2025

- Developed and deployed multiple AI models for real-time Military applications in NLP and Computer Vision,including:

classification, detection, tracking , chatbots using Agno.

- Built Flask-based Python backend systems to serve ML/DL models and integrate with internal tools and databases.

Software Engineer

Ariegsa Solutions (Remote) 3/2025-9/2025

- Used C++ with Qt/QML to design high-performance military software for simulators,monitoring systems and MFDs.
- Designed and Developed an Operation Software for an air craft simulator using C++ and Qt.
- Integration with Flight Simulators like Microsoft Flight Simulator and DCS.
- Providing Analytics for Flights, Pilot's attitude and performance using Flask and chart.js
- Designed and developed Rocket-Launch Decision Helper model to help the pilot in air combats.
- Delivered hands-on programming and AI training sessions.

AI and Backend Engineer

Connecto (Remotely) Currently working there

- Design, Development and deployment of Connecto Website and platform.
- Providing all technical solutions required for supporting company departments.
- Providing AI Features for Connecto Platform.
- Design, development and deployment of Connecto platform AI Agents.

CS Instructor

IT Spark, El Sahaba Center

- Taught Computer Science and BIS students foundational and advanced topics in:
 - Networking (routing, switching, protocols, and network configuration)
 - Web Development (HTML, CSS, JavaScript, backend fundamentals)
 - Python Programming (core programming concepts, problem-solving, OOP)
 - Machine Learning (supervised/unsupervised learning, model training, evaluation)
- Designed and delivered structured course materials, hands-on labs, and practical projects.
- Supported students with guidance, mentoring, and exam preparation in their technical tracks.

SKILLS

- | | | |
|--------------------|-----------------|------------------------|
| • Networking | • MySQL | • Software Deployment |
| • Python | • Flask & Quart | • Innovative thinking |
| • Machine Learning | • TensorFlow | • Communication skills |
| • Deep Learning | • C++/Qt/QML | • Leadership |
| • NLP & CV | • Restful APIs | • FastAPI |
| • Linux | • Deployment | • Agno Agents |

CERTIFICATES

- Web application Development Certificate, EAF-US GOV
- Python Programming and Flask framework, EAF
- Introduction to Computer Vision and NLP, EAF
- Cisco Network Administrator, US GOV
- C++ from beginner to expert, Udemy
- Qt, QML from beginner to expert, Udemy
- AI - Fundamentals, IBM
- Introducing Generative AI with AWS, Udacity

LANGUAGES

- Arabic (Native)
- English (C1)
