PROFESSIONAL SUMMARY

AI and Backend Engineer with 2+ years of hands-on experience building mission-critical AI systems for the Egyptian Air Force, specialising in NLP and Computer Vision. Currently serving as lead backend engineer at Connecto, an e-commerce management platform serving 2,000+ merchants across Amazon, Noon, Jumia, and Trendyol. Proven track record delivering high-performance solutions under high-stakes conditions, from military-grade simulators to real-time AI agents. Strong command of Python, C++, and full-stack web development, with experience deploying cloud-native systems on GCP.

WORK EXPERIENCE

AI & Backend Engineer • [Connecto \(Remote\)](#)

Sep 2025 – Present

- ▶ Lead backend architect of connecto-me.com — a unified e-commerce management platform serving 2,000+ merchants across Amazon, Noon, Jumia, and Trendyol.
- ▶ Designed, developed, and deployed the full Connecto web platform and its backend infrastructure from the ground up.
- ▶ Built and deployed AI-powered agents to automate product listing, catalogue management, and merchant workflows.
- ▶ Provided all technical solutions supporting cross-department operations, ensuring platform reliability and scalability.
- ▶ Delivered AI features including intelligent product image processing (background removal, platform compliance) and advanced analytics.

Software Engineer • [Ariegsa Solutions \(Remote\)](#)

Mar 2025 – Sep 2025

- ▶ Designed high-performance military software using C++ and Qt/QML for simulators, monitoring systems, and MFDs.
- ▶ Developed a full Operation Software for an aircraft simulator, integrating with Microsoft Flight Simulator and DCS.
- ▶ Engineered a Rocket-Launch Decision Helper model to assist pilots in real-time air combat scenarios.
- ▶ Delivered hands-on programming and AI training sessions to technical staff.

AI & Python Developer / Instructor • [Egyptian Air Force – ILS](#)

Aug 2024 – Aug 2025

- ▶ Developed and deployed multiple real-time AI models for military applications in NLP and Computer Vision, covering classification, detection, tracking, and agentic chatbots using Agno.
- ▶ Built Flask-based backend systems to serve ML/DL models and integrate with internal databases and military tools.
- ▶ Conducted structured AI and Python training sessions for technical military personnel.

Network Administrator & Backend Developer • [Egyptian Air Force – ILS](#)

Dec 2023 – Jul 2024

- ▶ Managed network administration and support across all Air Force units, leveraging Cisco networking expertise.
- ▶ Developed Flask web applications integrated with MySQL databases to serve and monitor secure military networks.

CS Instructor • [IT Spark – El Sahaba Center](#)

Concurrent

- ▶ Taught Networking, Web Development, Python, Machine Learning, Operating Systems, and Data Security to CS and BIS students.
- ▶ Designed course materials, hands-on labs, and practical projects; mentored students through exam preparation.

EDUCATION

B.Sc. Electrical Engineering — Computer Engineering & Artificial Intelligence

2018 – 2023

[Military Technical College](#) — Graduated with Very Good with Honours

- Graduation Project: Multimodal Sentiment Analysis system combining text, emoji, and audio in a unified deep learning model.

TECHNICAL SKILLS

Python	C++ / Qt / QML	Flask & FastAPI
Machine Learning	Deep Learning	NLP & Computer Vision
TensorFlow	Agno Agents	React
PostgreSQL	MySQL	Redis
RESTful APIs	GCP	Linux
Cisco Networking	Docker / Deployment	Software Integration

CERTIFICATIONS

- | | |
|---|---------------------|
| ▸ Web Application Development | EAF – US Government |
| ▸ Python Programming & Flask Framework | Egyptian Air Force |
| ▸ Introduction to Computer Vision & NLP | Egyptian Air Force |
| ▸ Cisco Network Administrator | US Government |
| ▸ C++ From Beginner to Expert | Udemy |
| ▸ Qt & QML From Beginner to Expert | Udemy |
| ▸ AI Fundamentals | IBM |
| ▸ Introducing Generative AI with AWS | Udacity |

LANGUAGES

Arabic — Native English — C1 (Advanced)
